

# KANGAROOON — WHITEPAPER

**Ticker:** \$TBA (To Be Announced)

**CA:** Coming Soon

**DexScreener:** DEX Screener

**Taglines:**

🦘 **No bags — just pouches**

🦘 **Join the \$TBA**

🦘 **Hopping our way to the moon**

---

## What's Kangaroon?

Kangaroon is not just another memecoin — it's a full-blown movement powered by Roo rage, community fire, and an unshakable Aussie spirit. Born in the Outback, bred on blockchain, and raised by a mob of crypto vets who've been around the pump a few times.

The core team behind Kangaroon has delivered successful launches in the past — no rugs, no sneaky dumps, no selling out for peanuts. We've built trust the hard way: by *not* screwing our holders. And we're hopping into \$TBA with the exact same energy.

### **No bags — just pouches.**

We don't hoard bags like greedy suits — we carry our future in a pouch, and we carry it *together*.

---

## The Roo Mission

Kangaroon has one sacred goal:

**Flip the Australian Roo population.**

There's around **50 million kangaroos** in the wild — and we're gunning for a **\$50 million market cap** to match.

**One Roo per dollar. One dollar per Roo.**

That's the prophecy. And the mob is making it real.

---

## Join the Mob

In Australia, a **group of kangaroos is called a mob**.

We're reclaiming that word — and giving it **blockchain teeth**.

**Join the \$TBA** and ride with the crew that kicks, claws, and *hops* its way through the charts. This ain't just a token. It's a Roovolution.

---

## Fair Launch, Fair Game

There'll be **no presale, no insider allocations, no backdoor deals**, and no shady business.

Kangaroon will launch **fair and square** on **Pump.fun**, giving *everyone* — including the team — the same shot at grabbing their bags (er... pouches).

Yep, you heard right. **The team will buy their tokens at launch just like the rest of the mob**. No early access, no special perks, just Roo boots on the ground with everyone else.

To keep things fair and avoid snipers and copycat fakes, **we'll announce the launch week in advance, but not the exact time or day**. When the time comes, the **contract address will first drop on our Telegram**, and a few minutes later on **our official X page**. That way, our most active mobsters — the ones actually riding with us — get first dibs.

---

## Sustainable Revenue, No Token Dumps

We're building Kangarooon with **long-term strength** in mind. That means no team selloffs, ever. All growth, marketing, and future listings will be **fully funded by external revenue** — not by dumping \$TBA.

How? We've got **three solid revenue streams** locked and loaded:

### 1. Pump.fun Creator Revenue Sharing

We'll earn **0.05% of all trading volume in SOL** thanks to Pump.fun's new creator revenue model. That's real income, not token fluff.

[Learn more](#)

### 2. Aussie Rap Music & Videos

Our first full album is already cooked and ready to drop. It's pure fire: tracks about **crypto brotherhood**, **Roo loyalty**, and **Outback vengeance**. We'll release our music across all major streaming platforms and generate ongoing royalties to fuel the Roo revolution.

### 3. Merch for the Mob

Once Kangarooon grows its pouch, we'll launch exclusive merch through our site. From tees to hoodies to Roo gear with attitude — the mob will wear it loud.

---

## Buy. Burn. Repeat.

Once costs are covered, **all extra revenue goes straight back to the market** — buying and burning \$TBA tokens. That means real **buy pressure**, less supply, and **more power to our holders**. Each transaction will be public and traceable, because we're not just talk.

We ain't here for a quick flip.

We're here to flip **50 million Roo legends** on the map.

---

## Final Word

We're not promising the moon.

We're **hopping our way there**.

**This is Kangarooon. This is \$TBA.**

**One Roo. One Dollar. One Mission.**

**Join the \$TBA or get stomped.** 🦘🔥
